

AVAILABLE POSITION

Job Title:	Health Information Technology Developer	FLSA Status:	Exempt
Reports To:	Health Information Technology Manager	Classification:	Classified
Department:	PartnerSolutions	Last Revision	N/A
Approved By:	Beth Watson, Director of Human Resources	Date:	10/30/2018

PURPOSE

Responsible for the design, development and support of effective and efficient NextGen based EHR templates and related SQL code. This position will be part of a team supporting multiple clients within the behavioral health specialty. Duties will include active participation during new implementations, definition and development of EHR templates and SQL data manipulation queries, performance of end-to-end testing of templates and SQL programming solutions, assist with development of SQL report/extract queries, and promoting increased efficiencies for our clients. In addition, this position will be required to provide continuous framework improvement analysis and recommendations.

ESSENTIAL JOB FUNCTIONS

- Develops, plans and analyzes, designs products, and programs computer software that requires extensive research.
- Performs product design and programming activities involving multiple modules or subsystems.
- Designs, tests and modify complex systems, modules and/or approaches and required enhancements.
- Design, prototype, develop NextGen EHR templates utilizing SDLC.
- Design, construct, implement, and maintain EHR reports as needed using standard SQL based query and reporting tools (Crystal, SSRS).
- Participate in the development and enforcement of policies, standards, and procedures for application support, report development, and practice builds.
- Create and maintain documentation for supported systems and enhancements.
- Maintain up-to-date knowledge of the NextGen EHR / EPM software application and related interfaces.
- Participates in design meetings and consults with other staff to evaluate interface between hardware and software and operational and performance requirements of overall system.
- Serves as a technical expert in the design, development, coding, testing, and debugging of new software.
- Perform complex analysis and troubleshooting in support of various EHR processes.
- Maintain and troubleshoot existing NextGen EHR while ensuring full functionality of the EPM product.
- Resolves customer complaints with software, and responds to suggestions for software modifications or enhancements.
- Perform continuous quality improvement of all processes as identified.
- Obtain and maintain a Professional Certificate within all HIT Systems and applicable areas.
- Maintain a high rate of customer satisfaction with the provider and board community.
- Assists in promoting cultural & linguistic competence within the Stark County community;
- Must work congenially and cooperatively with co-workers and affiliated boards and providers.
- Assumes added responsibilities and performs special projects as needed or directed
