NCQA's Multicultural Health Care Distinction: *A Roadmap for Addressing Health Care Disparities*

Efficient, high-quality health care requires health plans and providers to understand, respect and meet different language and cultural needs. Communication that people understand and respect for their differing values increases appropriate screenings, treatments and preventive care and decreases costs for preventable complications.

Failure to address language needs or to take racial, ethnic and cultural differences into account leads to worse health outcomes and higher health care spending. All too often, however, health plans and providers do not meet differing language and cultural needs. The result is widespread, harmful and costly health care disparities.

That is why reducing disparities is in the National Strategy for Quality Improvement, a recognized quality improvement activity under medical loss ratios, and cited in statute for quality improvement efforts in state Health Insurance Exchanges.

To help meet this growing need, the National Committee for Quality Assurance (NCQA) developed the Multicultural Health Care (MHC) Distinction Program. MHC Distinction is a voluntary program that aligns with NCQA's Health Plan Accreditation Program for insurers and other health care organizations. MHC Distinction includes rigorous and practical requirements for assessing and improving efforts to meet linguistic and cultural needs.

Roadmap for Addressing Disparities: The MHC standards show how to meet, and even exceed, federal Office of Minority Health (OMH) culturally and linguistically appropriate services (CLAS) standards. In fact, federal and state entities could deem organizations with NCQA MHC Distinction as satisfying OMH CLAS standards. They could require plans to obtain MHC Distinction as part of a general initiative targeting disparities, or encourage it through pay-for-performance initiatives. MHC Distinction also helps establish benchmarks for tracking improvement and measuring what works.

Through initiatives to earn MHC Distinction “we can drill down by race, ethnicity, language – even zip code on disparities we want to improve,” says Mary K Stom, MD, chief medical officer and senior vice president, Health Partners of Philadelphia, the first organization to receive MHC Distinction.¹ This helped Health Partners identify cultural barriers inhibiting good perinatal care in inner city African American neighborhoods. “We learned that women in these communities trust relatives and neighbors more than our nurses and education. So now we’re educating entire neighborhoods, not just pregnant women on that block.”

¹ A list of organizations that have earned MHC distinction is at <http://www.ncqa.org/tabid/1308/Default.aspx>.

Standards for NCQA's Multicultural Health Care Distinction

Race/Ethnicity & Language Data

- Collect members' ethnicity/language data in Office of Management and Budget categories
- Use a validated methodology to extrapolate or estimate ethnic population percentages based on reported data
- Use a system of effective data storage and retrieval for ethnic and linguistic information
- Report the HEDIS diversity of membership measure
- Identify "threshold languages" spoken by 5% of membership or 1,000 members, whichever population is smaller

Language Services

- Demonstrate use of competent translators, provide timely, high-quality translation
- Provide practitioners with individual data on the language preferences of the patients they treat, training on the provision of language services, and language assistance resources
- Regularly notify members of the availability of language services

Practitioner Network Cultural Responsiveness

- Collect and publish information on the languages contracted providers speak fluently, or languages for which they offer translation services
- Collect and disclose upon request provider race/ethnicity data
- Analyze the provider network's ability to serve members' language needs and develop ways to address gaps

CLAS Services Program

- Adopt a program description or work plan listing measurable goals for reducing disparities that ethnic and linguistic minorities experience, and include plans to monitor and evaluate services against measurable goals
- Conduct an annual accounting of activities meant to achieve performance improvement in reducing disparities, and evaluation of progress and trending in measurable outcomes

Reducing Health Care Disparities

- Collect, report and analyze clinical quality and patient experience measures by race, ethnicity and primary language and compare outcomes
- Make targeted interventions to improve disparities in relevant care measures, and continually evaluate their effectiveness.

NCQA staff can provide detailed information on the requirements upon request. To learn more, contact NCQA's Public Policy Department at 202-955-1705 or visit www.ncqa.org.

National Standards for Culturally and Linguistically Appropriate Services (CLAS) in Health and Health Care

The National CLAS Standards are intended to advance health equity, improve quality, and help eliminate health care disparities by establishing a blueprint for health and health care organizations to:

Principal Standard:

1. Provide effective, equitable, understandable, and respectful quality care and services that are responsive to diverse cultural health beliefs and practices, preferred languages, health literacy, and other communication needs.

Governance, Leadership, and Workforce:

2. Advance and sustain organizational governance and leadership that promotes CLAS and health equity through policy, practices, and allocated resources.
3. Recruit, promote, and support a culturally and linguistically diverse governance, leadership, and workforce that are responsive to the population in the service area.
4. Educate and train governance, leadership, and workforce in culturally and linguistically appropriate policies and practices on an ongoing basis.

Communication and Language Assistance:

5. Offer language assistance to individuals who have limited English proficiency and/or other communication needs, at no cost to them, to facilitate timely access to all health care and services.
6. Inform all individuals of the availability of language assistance services clearly and in their preferred language, verbally and in writing.
7. Ensure the competence of individuals providing language assistance, recognizing that the use of untrained individuals and/or minors as interpreters should be avoided.
8. Provide easy-to-understand print and multimedia materials and signage in the languages commonly used by the populations in the service area.

Engagement, Continuous Improvement, and Accountability:

9. Establish culturally and linguistically appropriate goals, policies, and management accountability, and infuse them throughout the organization's planning and operations.
10. Conduct ongoing assessments of the organization's CLAS-related activities and integrate CLAS-related measures into measurement and continuous quality improvement activities.
11. Collect and maintain accurate and reliable demographic data to monitor and evaluate the impact of CLAS on health equity and outcomes and to inform service delivery.
12. Conduct regular assessments of community health assets and needs and use the results to plan and implement services that respond to the cultural and linguistic diversity of populations in the service area.
13. Partner with the community to design, implement, and evaluate policies, practices, and services to ensure cultural and linguistic appropriateness.
14. Create conflict and grievance resolution processes that are culturally and linguistically appropriate to identify, prevent, and resolve conflicts or complaints.
15. Communicate the organization's progress in implementing and sustaining CLAS to all stakeholders, constituents, and the general public.

The Case for the Enhanced National CLAS Standards

Of all the forms of inequality, injustice in health care is the most shocking and inhumane.
— Dr. Martin Luther King, Jr.

Health equity is the attainment of the highest level of health for all people (U.S. Department of Health and Human Services [HHS] Office of Minority Health, 2011). Currently, individuals across the United States from various cultural backgrounds are unable to attain their highest level of health for several reasons, including the social determinants of health, or those conditions in which individuals are born, grow, live, work, and age (World Health Organization, 2012), such as socioeconomic status, education level, and the availability of health services (HHS Office of Disease Prevention and Health Promotion, 2010). Though health inequities are directly related to the existence of historical and current discrimination and social injustice, one of the most modifiable factors is the lack of culturally and linguistically appropriate services, broadly defined as care and services that are respectful of and responsive to the cultural and linguistic needs of all individuals.

Health inequities result in disparities that directly affect the quality of life for all individuals. Health disparities adversely affect neighborhoods, communities, and the broader society, thus making the issue not only an individual concern but also a public health concern. In the United States, it has been estimated that the combined cost of health disparities and subsequent deaths due to inadequate and/or inequitable care is \$1.24 trillion (LaVeist, Gaskin, & Richard, 2009). Culturally and linguistically appropriate services are increasingly recognized as effective in improving the quality of care and services (Beach et al., 2004; Goode, Dunne, & Bronheim, 2006). By providing a structure to implement culturally and linguistically appropriate services, the enhanced National CLAS Standards will improve an organization's ability to address health care disparities.

The enhanced National CLAS Standards align with the HHS Action Plan to Reduce Racial and Ethnic Health Disparities (HHS, 2011) and the National Stakeholder Strategy for Achieving Health Equity (HHS National Partnership for Action to End Health Disparities, 2011), which aim to promote health equity through providing clear plans and strategies to guide collaborative efforts that address racial and ethnic health disparities across the country. Similar to these initiatives, the enhanced National CLAS Standards are intended to advance health equity, improve quality, and help eliminate health care disparities by providing a blueprint for individuals and health and health care organizations to implement culturally and linguistically appropriate services. Adoption of these Standards will help advance better health and health care in the United States.

National Standards for Culturally and Linguistically Appropriate Services in Health and Health Care

National CLAS Standards: Fact Sheet

Purpose

The enhanced National CLAS Standards are intended to advance health equity, improve quality, and help eliminate health care disparities by establishing a blueprint for individuals as well as health and health care organizations to implement culturally and linguistically appropriate services.

The enhanced Standards are a comprehensive series of guidelines that inform, guide, and facilitate practices related to culturally and linguistically appropriate health services.

History & Enhancement Initiative

The National CLAS Standards were first developed by the HHS Office of Minority Health in 2000. Following 10 years of successful implementation, the Office of Minority Health launched an initiative to update the Standards to reflect the tremendous growth in the field of cultural and linguistic competency since 2000 and the increasing diversity of the nation.

The Enhancement Initiative lasted from 2010 to 2013, and it had three major components: a public comment period, a systematic literature review, and ongoing consultations with an advisory committee comprised of leaders and experts from a variety of settings in the public and private sectors.

The Case for the National CLAS Standards

The enhanced National CLAS Standards were developed in response to health and health care disparities, changing demographics, and legal and accreditation requirements. With the Institute of Medicine's publication of *Unequal Treatment* in 2003, culturally and linguistically appropriate services gained recognition as an important way to help address the persistent disparities faced by our nation's diverse communities. There have also been rapid changes in demographic trends in the U.S. in the last decade. Additionally, national accreditation standards for professional licensure in the fields of medicine and nursing, and health care policies, such as the Affordable Care Act, have also helped to underscore the importance of cultural and linguistic competency as part of high quality health care and services.

The enhanced National CLAS Standards address these new developments and trends, and offer an even stronger framework to provide culturally and linguistically appropriate services. The enhanced National CLAS Standards are intended to advance health equity, improve quality, and help eliminate health care disparities.

Enhancements to the National CLAS Standards

The enhanced National CLAS Standards have a broader reach to address the importance of cultural and linguistic competency at every point of contact throughout the health care and health services continuum. Specifically, the Standards' conceptualization of culture, audience, health, and recipients were expanded:

National Standards for Culturally and Linguistically Appropriate Services in Health and Health Care

Expanded Standards	National CLAS Standards 2000	National CLAS Standards 2013
Culture	Defined in terms of racial, ethnic and linguistic groups	Defined in terms of racial, ethnic and linguistic groups, as well as geographical, religious and spiritual, biological and sociological characteristics
Audience	Health care organizations	Health and health care organizations
Health	Definition of health was implicit	Explicit definition of health to include physical, mental, social and spiritual well-being
Recipients	Patients and consumers	Individuals and groups

Given this conceptual foundation, the enhanced National CLAS Standards are structured as follows:

- Principal Standard (Standard 1): Provide effective, equitable, understandable, and respectful quality care and services that are responsive to diverse cultural health beliefs and practices, preferred languages, health literacy, and other communication needs.
- Governance, Leadership, and Workforce (Standards 2-4)
- Communication and Language Assistance (Standards 5-8)
- Engagement, Continuous Improvement, and Accountability (Standards 9-15)

Implementation Resource: *The Blueprint*

The Standards' implementation "on the ground" will vary from organization to organization. It is important for individuals and organizations to have a vision of what culturally and linguistically appropriate services will look like in practice and to identify available and required resources.

A Blueprint for Advancing and Sustaining CLAS Policy and Practice, or The Blueprint, is a new guidance document for the National CLAS Standards that discusses implementation strategies for each Standard. This resource and others relating to the National CLAS Standards are available at OMH's Think Cultural Health website: www.ThinkCulturalHealth.hhs.gov.

Next Steps

Successful implementation of the enhanced National CLAS Standards will depend on continued collaboration from the diverse stakeholders, as well as health care consumers. Please visit www.ThinkCulturalHealth.hhs.gov to learn more about promotion activities, collaboration opportunities, technical assistance, assessment and evaluation. Take action now by emailing your experiences related to CLAS to AdvancingCLAS@ThinkCulturalHealth.hhs.gov.

MOUNT CARMEL
POLICY/PROCEDURE

SUBJECT: NON-DISCRIMINATION

DEPARTMENT OVERSIGHT AND MAINTENANCE: Administrative

POLICY:

1. Mount Carmel Health System does not discriminate against any person on the basis of race, color, national origin, gender identity, sexual orientation, disability or age in the admission, treatment, or participation in its programs, services and activities, or in employment.
2. Mount Carmel Health System does not discriminate on the basis of disability in accordance with Title VI of the Civil Rights Act of 1964 and the Age Discrimination Act of 1975. An internal grievance policy/procedure is in place providing for prompt and equitable resolution of complaints alleging any action prohibited by Section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) or the US Department of Health and Human Services regulations implementing the Act.
3. Any person who believes she or he has been subjected to discrimination based upon disability may file a grievance with the 504 Coordinator under this procedure. The Patient Safety-Risk Manager is the 504 Coordinator for Mount Carmel Health System. It is against the law for Mount Carmel to retaliate against anyone who files a grievance or cooperates in the investigation of a grievance.
4. Mount Carmel Health System makes arrangements to ensure that disabled persons are provided for appropriately if needed to participate in the grievance process. Such arrangements may include, but are not limited to, providing interpreters for the deaf, providing taped cassettes of materials for the blind, or assuring a barrier free location for the proceedings. The Patient Safety-Risk Manager is responsible for making these arrangements.
5. Mount Carmel and all of its programs and activities are accessible to and useable by disabled persons, including persons who are deaf, hard of hearing, or blind, or who have other sensory impairments. Access features include:
 - a. Convenient parking designated specifically for disabled persons
 - b. Curb cuts and ramps between parking areas and buildings
 - c. Level access into first floor level with elevator access to all floors
 - d. Fully accessible offices, meeting rooms, bathrooms, public waiting areas, cafeteria, patient treatment areas, including examining rooms and patient rooms.
 - e. A full range of assistive and communication aids provided to persons who are deaf, hard of hearing, blind or with other sensory impairments. There is no additional charge for such aids.
 1. Qualified sign language interpreters
 2. 24 hour telecommunication device (TTY/TDD)
 3. Readers and taped materials for the blind, and large print materials for the visually impaired
 4. Flash cards, alphabet boards and other communication boards

MOUNT CARMEL
POLICY/PROCEDURE

SUBJECT: NON-DISCRIMINATION

5. Assistive devices for persons with impaired manual skills.

RESPONSIBLE PERSONS: All staff

SPECIAL COMMENTS:

- A. Disabilities not only include hard of hearing, deaf, blind, or those with sensory impairments, but also those utilizing wheelchairs, canes, crutches etc.
- B. Section 504 states in part that no handicapped person shall, on the basis of handicap, be excluded from participation in, be denied the benefits of, or otherwise be subjected to discrimination under any program or activity which receives federal funding.
- C. For further information about this policy, contact

QUICK GUIDE

Ready to get started? Use the quick start guides below to find the resources you are looking for. You can find resources that address each of the National CLAS Standards or search by population, type of resource, user or setting.

Still need more information? We provide detailed information on this toolkit, how it is organized and how to navigate it in the Introduction.

INTRODUCTION

BACKGROUND

Despite decades of attention and awareness, health care disparities persist across the United States. Racial and ethnic minorities, people with limited English proficiency (LEP) and low health literacy, sexual and gender minorities and people with disabilities experience worse health outcomes, decreased access to health care services and lower quality care than the general population. The vision of the CMS OMH (Centers for Medicare & Medicaid Services Office of Minority Health) is to eliminate disparities in health care quality and access through the development, implementation and evaluation of programs and policies that incorporate the needs and voices of the populations they serve. Under a contract with CMS OMH, NCQA developed *A Practical Guide to Implementing the National CLAS Standards: For Racial, Ethnic and Linguistic Minorities, People with Disabilities and Sexual and Gender Minorities* (toolkit).

The provision of culturally and linguistically appropriate services (CLAS) is important for combating disparities. In 2000, the U.S. Department of Health and Human Services Office of Minority Health promulgated the National CLAS Standards, and in 2013 released the enhanced [National CLAS Standards](#) to guide health and health care organizations in their efforts to ensure health equity. The National CLAS Standards describe a framework to deliver services that are culturally and linguistically appropriate and respectful, and that respond to patients' cultural health beliefs, preferences and communication needs. Standards can be employed by all members of a health care organization, state or community.

PURPOSE

The purpose of this toolkit is to enable organizations to implement the National CLAS Standards and improve health equity. It is organized according to the enhanced National CLAS Standards, and provides practical tools and examples of CLAS, in addition to efforts to implement the National CLAS Standards that can be adapted for use by health care organizations. It is intended for organizations that have already decided to pursue CLAS, to improve equity and eliminate health care disparities; it is not a decision guide about whether to implement National CLAS Standards.

INTENDED AUDIENCE

This toolkit is designed for use by health care organizations, including health plans, provider practices and hospitals, states and communities, that have decided to improve health equity and implement the National CLAS Standards. Although many of its resources were designed for a specific user or setting, such as a hospital leader, they be used or adapted to other users and settings. In these cases, we have identified all relevant users and the settings. Resources are targeted to various minority and disadvantaged populations, including racial and ethnic minorities, and to linguistic minorities, people with low health literacy, sexual and gender minorities and people with disabilities. They include organizational policies focused on the provision of CLAS, practical tools for use by organizations and providers, training and educational resources for organizational governance, leadership and providers, assessment tools to gauge cultural competence and examples of programs designed to provide culturally competent and person-centered care. The toolkit includes the following types of resources related to CLAS: 1) resources on how to implement CLAS; and 2) practical tools that directly support implementation of CLAS (e.g., training for staff, patient materials), denoted by the icons below.

Two additional resource compilations are being developed with funding from CMS OMH. L&M Policy Research is developing a compendium of resources for practices, organizations, hospitals, states and communities with little or no experience in developing CLAS, designed to help these entities develop a business case for and integrate health equity into their organizations. The National Opinion Research Center (NORC) at the University of Chicago is also developing a collection of resources for organizations that focuses on health equity, data collection and data stratification based on race and ethnicity. The L&M and NORC toolkits complement this toolkit and can be used in tandem to implement CLAS.

HOW TO USE THE TOOLKIT

Resources included in this toolkit are organized in a table to highlight how they relate to each domain and standard of the National CLAS Standards. Regarding the toolkit's organization:

- The toolkit is divided into four chapters that follow the organization of the National CLAS Standards:
 1. Principal Standard
 2. Governance, Leadership and Workforce
 3. Communication and Language Assistance
 4. Engagement, Continuous Improvement and Accountability
- Relevant tools and resources are listed in each section, with brief descriptions of the resources. They are organized by:
 - the resource type (e.g., background information or training material)
 - the population the resource is relevant to (e.g., sexual and gender minority, people with disabilities, racial/ethnic minority)
 - and each is tagged with a “user” and “setting” to indicate for whom and in what setting the resource is applicable
- Appendix 1 contains resources dated prior to 2005.
- Appendix 2 contains a list of organizations that advocate on behalf of, or provide additional resources or services to improve health equity for each population. Each entry includes a brief description of the organization and resources that can be found on its Web site. In a few cases, the appendix lists published literature applicable to a population, but that require journal access and are not free. The appendix listings are arranged by population.
- Some resources are listed in multiple sections.

The resources in this toolkit were current at the time they were selected for inclusion. The content was reviewed by an expert panel to ensure relevance and importance. However, the resources were compiled from a variety of sources and we make no representation or warranty regarding the availability, completeness, quality, or adequacy of the resources.

NAVIGATING THIS TOOLKIT

The toolkit can be navigated in multiple ways. The following table gives tips for reviewing or searching for resources.

	What are these?	How to search:
CLAS Standard	<p>There are four themes of the National CLAS Standards; each chapter addresses a theme:</p> <ol style="list-style-type: none"> 1. Principal Standard; 2. Governance, Leadership and Workforce; 3. Communication and Language Assistance; 4. Engagement, Continuous Improvement and Accountability <p>Relevant National CLAS Standards are listed at the start of each chapter. Each chapter is subdivided into topics that align with the individual standards in that chapter and resources are organized by topic within each domain.</p>	<p>Users can search for resources that relate to each National CLAS standard by going to the appropriate chapter.</p>
Resource Type	<p>Resources are identified by type to help users identify how the resource may be used.</p> <p>The types of resources include:</p> <ul style="list-style-type: none"> • Background information. • Practical tools to guide provision of CLAS. • Training material for leadership and staff. • Tools for assessment or measurement. • Resources to share with patients. • Examples of organizations intervening to improve provision of CLAS. <p>Every resource type is easily identified using the resource type icon. The icon key is listed after this table.</p>	<p>Users who want to identify resources by type can:</p> <ol style="list-style-type: none"> 1. Use the resource type icon. 2. Search for the resource type keyword. 3. Consult the index at the end of this toolkit that identifies all resource by type.
Population	<p>The population is the group or subject targeted by the resource.</p> <p>Resources are further grouped under 5 populations that have been identified as more likely to experience disparities in care:</p> <ul style="list-style-type: none"> • People with disabilities. • People with limited English proficiency. • People with low health literacy. • Racial/ ethnic minorities. • Sexual and gender minorities. <p>We indicate when resources address the provision of CLAS generally or across populations, using the heading “All populations.”</p>	<p>Users who want to identify resource relevant to a specific population can:</p> <ol style="list-style-type: none"> 1. Use the population heading to identify the population. 2. Search for population keyword. 3. Consult the index at the end of this toolkit that identifies all resources relevant to a population.
User	<p>The user indicates which type of professionals may find these resources relevant.</p> <p>Every resource is tagged with a user, which include:</p> <ol style="list-style-type: none"> 1. Leader: <ul style="list-style-type: none"> • Organizational management or anyone with strategic position interested in improving disparities in a health care organization, medical directors, quality directors, diversity coordinators, healthy equity council members, etc. 2. Provider: <ul style="list-style-type: none"> • Physicians, nurses, all clinical staff who interact with the patient, medical students 3. Staff: <ul style="list-style-type: none"> • Nonclinical administrative staff, interpreters, customer service staff, etc. 	<p>Users can identify the audience of interest using the icon, or they can search the toolkit using the audience keyword.</p> <p>Tip: Use “User” and “Setting” (see below) tags together. For example, a health plan quality director would want to look for resources tagged Leader and Health care organization.</p>

	What are these?	How to search:
Setting	<p>The setting indicates type of health care environment to which resources are relevant, even if the title of the resource is specific to a setting:</p> <ol style="list-style-type: none"> 1. Hospital 2. Health care organization (e.g., clinic, practice, ancillary services, integrated delivery organization, health plan) 3. Community organization: Health care oriented but not providing clinical services <p>Every resource is tagged for the setting.</p>	<p>Users can identify the setting using the icon or can search the toolkit using the setting keyword.</p> <p>Tip: Use “User” and “Setting” (see below) tags together. For example, a health plan quality director would want to look for resources tagged Leader and Health care organization.</p>

RESOURCE ICON KEY

Resources are identified by type to guide users and highlight how they may be used. The key below displays the icon and a description of each type of resource.

Icon	Type of Resource	Description
	Background information	Background information is not a “tool” that can be adopted for use. Rather, it comprises information about the related topic and population.
	Practical tool	Tools that are easy to use and implement by providers and organizations. They include items “to-do” lists, questions to ask and/or forms that can be filled in and customized to an organization.
	Training material	Curricula, training materials or Webinars for organizational leadership and management, providers and staff.
	Assessment or measurement tool	Tools to gauge how well an organization performs on CLAS-related strategies.
	Resource to share with patients	Patient-education or -engagement materials.

1.

Principal Standard

Provide effective, equitable, understandable, and respectful quality care and services that are responsive to diverse cultural health beliefs and practices, preferred languages, health literacy, and other communication needs.

Chapter Section:

Effective, equitable, understandable, and respectful quality care and services

EFFECTIVE, EQUITABLE, UNDERSTANDABLE, AND RESPECTFUL QUALITY CARE AND SERVICES

Background Information	People with Disabilities
	<p>Resources for Integrated Care (2013)—Disability-Competent Care - What Is It And Why Is It Important? (Webinar)</p> <p>User: Leader, Provider, Staff Setting: Hospital, Health care organization</p> <ul style="list-style-type: none"> • The objective of this Webinar is to introduce the Disability-Competent Care (DCC) model by: <ul style="list-style-type: none"> – Understanding the population of persons living with disabilities—incidence, population subsets and disparities – Understanding what it means to be disability-competent – Introducing the building blocks of the disability-competent model of care – Understanding the scope of the dysfunction of the health care delivery system experienced by persons with disabilities – Making the DCC model financially viable by focusing on the Triple Aim. <p>Independence Care System – New York Lawyers for the Public Interest (2012)—Breaking Down Barriers, Breaking the Silence: Making Health Care Accessible for Women with Disabilities</p> <p>User: Leader Setting: Hospital, Health care organization</p> <ul style="list-style-type: none"> • Breaking Down Barriers, Breaking the Silence reports on a number of current issues in health care access for women with disabilities such as the costs of care, legal frameworks for providing health care access, and common barriers to access. The report also provides a list of recommendations to medical providers and policymakers. <p>World Health Organization (2011)—World Report on Disability</p> <p>User: Leader, Provider Setting: Hospital, Health care organization, Community organization</p> <ul style="list-style-type: none"> • The report provides evidence about what works to overcome barriers to health care, rehabilitation, education, employment and support services, and to create the environments that will enable people with disabilities to flourish. The report ends with a concrete set of recommended actions for governments and their partners. <p>Low Health Literacy</p> <p>Institute of Medicine (2014)—Health Literacy and Numeracy - Workshop Summary</p> <p>User: Leader, Provider Setting: Hospital, Health care organization</p> <ul style="list-style-type: none"> • The Health Literacy and Numeracy—Workshop Summary discusses a number of topics related to numeracy, including the effects of ill health on cognitive capacity, issues with communication of health information to the public and communicating numeric information for decision making. The chapters included in this report are: 1) Overview of numeracy; 2) Numeracy demands, assumptions, and challenges for consumers; 3) Numeracy demands, assumptions, and challenges for communicators; and 4) Strategies for effective communication. <p>Institute of Medicine (2009)—Toward Health Equity and Patient-Centeredness: Integrating Health Literacy, Disparities Reduction, and Quality Improvement. Workshop Summary</p> <p>User: Leader, Provider Setting: Hospital, Health care organization</p> <ul style="list-style-type: none"> • The workshop summary, Toward Health Equity and Patient-Centeredness: Integrating Health Literacy, Disparities Reduction, and Quality Improvement, explores how equity in care delivered and a focus on patients could be improved through concentration on eliminating health disparities and addressing issues of health literacy. The summary report includes the following chapters: 1) Opportunity at the intersection of quality improvement, disparities reductions, and health literacy; 2) Building the foundation for integrating health literacy, disparities reductions, and quality improvement in health and health care; and 3) Integration at the practitioner level, as well as breakout groups and policy issues.

EFFECTIVE, EQUITABLE, UNDERSTANDABLE, AND RESPECTFUL QUALITY CARE AND SERVICES

Background Information	Racial and Ethnic Minorities
	<p>Department of Health and Human Services (2011)—HHS Action Plan to Reduce Racial and Ethnic Health Disparities</p> <p>User: Leader, Provider Setting: Hospital, Health care organization, Community organization</p> <ul style="list-style-type: none"> The HHS Action Plan to Reduce Racial and Ethnic Disparities provides a summary of ethnic and racial health disparities. The Action Plan commits HHS to the continuing assessment of programs' impact on racial and ethnic health disparities. In concert with the 2011 National Partnership for Action's (NPA) Stakeholder Strategy, the plan provides a national roadmap for public and private leadership and partners. <p>Institute of Medicine (2008)—Challenges and Successes in Reducing Health Disparities. Workshop Summary</p> <p>User: Leader Setting: Hospital, Health care organization, Community organization</p> <ul style="list-style-type: none"> The report provides a summary of the Roundtable on Health Disparities that had the following goals: <ol style="list-style-type: none"> 1) Increase the visibility of racial and ethnic health disparities as a national problem; 2) Further the development of programs and strategies to reduce disparities; 3) Foster the emergence of leadership on this issue; 4) Track promising activities and developments in health care that could lead to dramatically reducing or eliminating disparities. The report includes chapters on the impact of geography on health disparities, clinical and community development approaches and successful strategies to reduce disparities. It also includes a section, "Community Approaches to Addressing Health Disparities" which may be relevant to users.
	<p>Sexual and Gender Minorities</p> <p>Substance Abuse and Mental Health Services Administration (SAMHSA) (2012)—Top Health Issues for LGBT Populations Information & Resource Kit</p> <p>User: Leader, Provider, Staff Setting: Hospital, Health care organization, Community organization</p> <ul style="list-style-type: none"> The Top Health Issues for LGBT Populations Information & Resource Kit targets organizations and individuals that serve LGBT populations, and provides an overview of current health issues among LGBT populations. The kit includes a list of terms and definitions specific to gender identity and gender expression, and to sexual identity and sexual orientation. <p>Institute of Medicine (2011)—The Health of Lesbian, Gay, Bisexual, and Transgender People: Building a Foundation for Better Understanding</p> <p>User: Leader, Provider, Staff Setting: Hospital, Health care organization, Community organization</p> <ul style="list-style-type: none"> The Health of Lesbian, Gay, Bisexual, and Transgender People: Building a Foundation for Better Understanding, evaluates the health status of lesbian, gay, bisexual, and transgender populations, identifies research gaps and opportunities and outlines a research agenda. The report includes the following chapters: context for LGBT Health Status in the United States; conducting research on the health status of LGBT populations; health issues by age; and recommendations for improving LGBT health. <p>The Joint Commission (2011)—Advancing Effective Communication, Cultural Competence, and Patient- and Family-Centered Care for the Lesbian, Gay, Bisexual, and Transgender (LGBT) Community: A Field Guide</p> <p>User: Leader, Provider, Staff Setting: Hospital, Health care organization, Community organization</p> <ul style="list-style-type: none"> The LGBT Field Guide serves as an organizational self-assessment tool and educational resource for hospitals and health care organizations to address the needs of LGBT patients and families. Each chapter contains both recommended issues to address and practice examples; the appendices include educational information on applicable Joint Commission standards; current laws, regulations, executive materials and a resource guide.

2.

Governance, Leadership, and Workforce

- Advance and sustain organizational governance and leadership that promotes CLAS and health equity through policy, practices, and allocated resources.
- Recruit, promote, and support a culturally and linguistically diverse governance, leadership, and workforce that are responsive to the population in the service area.
- Educate and train governance, leadership, and workforce in culturally and linguistically appropriate policies and practices on an ongoing basis.

Chapter Sections:

- Organizational governance and leadership to promote CLAS and health equity
- Recruitment of culturally and linguistically competent leadership and workforce
- Training and education for culturally and linguistically competent governance, leadership and workforce

ORGANIZATIONAL GOVERNANCE AND LEADERSHIP TO PROMOTE CLAS AND HEALTH EQUITY

Background Information	All Populations
	<p data-bbox="414 415 1128 472">The Disparities Solution Center (2008)—Improving Quality and Achieving Equity: A Guide for Hospital Leaders</p> <p data-bbox="414 483 1063 541">User: Leader, Provider, Staff Setting: Hospital, Health care organization, Community organization</p> <ul data-bbox="414 556 1453 756" style="list-style-type: none"> • Improving Quality and Achieving Equity: A Guide for Hospital Leaders is based on three goals: (1) Present the evidence for racial and ethnic disparities in health care and provide the rationale for addressing them with a focus on quality, cost risk management and accreditation; (2) Highlight model practices, hospitals and leaders who are actively engaged in addressing disparities and achieving equity; and (3) Recommend a set of activities and resources that can help hospital leaders initiate an agenda for action in this area. The Guide includes a recommendations checklist to direct hospital leaders on developing systems to improve quality, address disparities and achieve equity. <p data-bbox="414 777 609 808">Low health literacy</p> <p data-bbox="414 829 1307 861">Institute of Medicine (2014)—Ten Attributes of Health Literate Health Care Organizations</p> <p data-bbox="414 871 1063 930">User: Leader Setting: Hospital, Health care organization, Community organization</p> <ul data-bbox="414 945 1404 1029" style="list-style-type: none"> • This paper presents 10 attributes that exemplify a health literate health care organization. Each attribute includes a brief explanation of the meaning of and basis for the attribute and a set of implementation strategies for achieving the attribute.
Practical Tool	Low health literacy
	<p data-bbox="414 1108 1323 1165">Unity Point Health (2014)—Building Health Literate Organizations: A Guidebook to Achieving Organizational Change</p> <p data-bbox="414 1176 1063 1234">User: Leader Setting: Hospital, Health care organization, Community organization</p> <ul data-bbox="414 1249 1453 1333" style="list-style-type: none"> • This guidebook will help health care organizations of any size engage in organizational change to become health literate. It complements many excellent health literacy resources and includes background, resources, examples and lessons learned.

ORGANIZATIONAL GOVERNANCE AND LEADERSHIP TO PROMOTE CLAS AND HEALTH EQUITY

Practical Tool	Sexual and gender minorities
	<p>National LGBT Health Education Center (A Program of The Fenway Institute) (2015)—Ten Things: Creating Inclusive Health Care Environments for LGBT People (Webinar)</p> <p>User: Leader, Provider, Staff Setting: Hospital, Health care organization, Community organization</p> <ul style="list-style-type: none"> • Ten Things: Creating Inclusive Health Care Environments for LGBT People provides 10 recommendations on what health centers and health care organizations can do to achieve a more inclusive and affirming health care environment. This resource is also available as a 1-hour Webinar that reviews the same content as the PDF, and requires registration but is free. <p>SAGE’s National Resource Center on LGBT Aging (2011)—Inclusive Services for LGBT Older Adults: A practical guide to creating welcoming agencies</p> <p>User: Leader, Provider, Staff Setting: Hospital, Health care organization, Community organization</p> <ul style="list-style-type: none"> • This publication helps answer the question, “How can our mainstream aging organization provide inclusive and welcoming services to older lesbian, gay, bisexual and transgender adults?” Written with suggestions, tips and practical ideas from mainstream aging providers in the field, along with SAGE and the National Resource Center on LGBT Aging’s partners.
Training Material	Sexual and gender minorities
	<p>National LGBT Health Education Center (A Program of The Fenway Institute) (2012)—Addressing the Needs of LGBT People in Community Health Centers: What the Governing Board Needs to Know</p> <p>User: Leader Setting: Hospital, Health care organization, Community organization</p> <ul style="list-style-type: none"> • This brochure offers governing board members an introduction to LGBT people and their health needs, and what health centers can do to support them. <p>SAGE’s National Resource Center on LGBT Aging (no date, n.d.)—Building Respect for Older LGBT Adults Learning Modules and Supplemental information for Staff (Webinars)</p> <p>User: Leader, Provider, Staff Setting: Hospital, Health care organization, Community organization</p> <ul style="list-style-type: none"> • The tool is intended for long-term care and other aging service providers as an introduction to LGBT aging. The tool requires registration, but is free of charge. This tool includes 6 modules: <ul style="list-style-type: none"> – Module 1: Introduction to the issues facing LGBT older adults – Module 2: Simple steps and ideas you can implement right away to create a more welcoming environment for LGBT older adults – Module 3: Scenarios that staff in long-term care facilities might encounter when working with LGBT residents, some of which may also arise in non-residential settings – Module 4: The Federal Nursing Home Reform Act (FNHRA) that details the rights of all long-term care residents and protects them from discrimination – Module 5: A glimpse at an in-person cultural competency training offered through SAGE’s National Resource Center on LGBT Aging – Module 6: Making a difference <p>This supplemental information document, intended as a companion piece to the online learning tool, offers additional information and ideas for service providers in nonresidential settings to adapt the information in each module.</p>

ORGANIZATIONAL GOVERNANCE AND LEADERSHIP TO PROMOTE CLAS AND HEALTH EQUITY

- The Diversity in Health Care: Examples from the Field Web site provides a collection of case studies from the field that focus on six diversity initiatives implemented at hospitals across the country. It requires registration to download, but is free of charge.

TRAINING AND EDUCATION FOR CULTURALLY AND LINGUISTICALLY COMPETENT GOVERNANCE, LEADERSHIP AND WORKFORCE

Practical Tool	All populations
	<p>The Joint Commission (2010)—Advancing Effective Communication, Cultural Competence, and Patient- and Family-Centered Care: A Roadmap for Hospitals User: Leader, Provider Setting: Hospital, Health care organization, Community organization</p> <ul style="list-style-type: none"> • Advancing Effective Communication, Cultural Competence, and Patient- and Family-Centered Care: A Roadmap for Hospitals guides and provides suggestions for hospitals on how to integrate concepts from communication, cultural competence and patient- and family-centered care into their organizations. The document covers a breadth of information for hospitals and contains references to practical tools, some of which may also be relevant to physicians. It provides methods for hospitals to begin or improve efforts to ensure that all patients receive the same high-quality care. Each chapter includes a checklist of recommended issues guided by an expert advisory panel.
	<p>People with disabilities</p>
	<p>United Spinal Association (2015)—Disability Etiquette: Tips on Interacting with People with Disabilities User: Leader Setting: Hospital, Health care organization, Community organization</p> <ul style="list-style-type: none"> • The Disability Etiquette guides people on how to interact more effectively with people with disabilities <p>U.S. Department of Health & Human Services (n.d.)—Example of a Policy and Procedure for Providing Auxiliary Aids for Persons with Disabilities User: Leader Setting: Hospital, Health care organization, Community organization</p> <ul style="list-style-type: none"> • HHS created an example of an organizational policy that outlines the procedure for providing aid to persons with disabilities. The example allows organizations to update the policy with the name of their group and sections that are relevant to their organization
	<p>Sexual and gender minorities</p>
<p>Substance Abuse and Mental Health Services Administration (SAMHSA) (2014)—A Practitioner’s Resource Guide: Helping Families to Support Their LGBT Children User: Provider Setting: Health care organization, Community organization</p> <ul style="list-style-type: none"> • This resource guide was developed to help practitioners understand the critical role of family and caregiver acceptance and rejection in contributing to the health and well-being of adolescents who identify as LGBT. Includes practitioners who work in primary care, behavioral health, school based services, family service agencies, homeless and runaway programs, and foster care and juvenile justice settings. <p>National LGBT Health Education Center (A Program of The Fenway Institute) (2014)—Providing Welcoming Services and Care for LGBT People: A Learning Guide for Health Care Staff User: Provider, Staff Setting: Health care organization, Community organization</p> <ul style="list-style-type: none"> • This learning guide provides background information on LGBT people and their health needs, plus tips and strategies to improve communication and create a welcoming environment, and helpful resources, a glossary of terms and additional information about care for LGBT people. Includes suggestions for training and orienting staff and case examples. <p>National LGBT Health Education Center (A Program of The Fenway Institute) (2013)—Affirmative Care for Transgender and Gender Non-Conforming People: Best Practices for Front-line Health Care Staff User: Provider, Staff Setting: Health care organization, Community organization</p> <ul style="list-style-type: none"> • Best Practices provides background information on transgender people and their health needs, and tips and strategies to improve communication and create a more affirming environment. <p>The Joint Commission (2011)—Advancing Effective Communication, Cultural Competence, and Patient- and Family-Centered Care for the Lesbian, Gay, Bisexual, and Transgender (LGBT) Community: A Field Guide User: Leader, Provider, Staff Setting: Hospital, Health care organization, Community organization</p> <ul style="list-style-type: none"> • The LGBT Field Guide serves as a self-assessment tool and educational resource for hospitals and health care organizations to address the needs of LGBT patients and families. Each chapter contains both recommended issues to address and practice examples; the appendices include information on applicable Joint Commission standards; current laws, regulations, executive materials and a resource guide. 	

TRAINING AND EDUCATION FOR CULTURALLY AND LINGUISTICALLY COMPETENT GOVERNANCE, LEADERSHIP AND WORKFORCE

Training Material	All populations
	<p>Cigna (2014)—Close the Cultural Divide: Learn steps in bridging the cultural divide between patients and health care professionals (Webinar)</p> <p>User: Provider Setting: Health care organization</p> <ul style="list-style-type: none"> • This free 30-minute Webinar offers strategies for helping culturally diverse patients adhere to medications. Registration is not required to view the Webinar. <p>Think Cultural Health Clearinghouse (2013)—A Physician’s Practical Guide to Culturally Competent Care</p> <p>User: Provider Setting: Health care organization</p> <ul style="list-style-type: none"> • A Physician’s Practical Guide to Culturally Competent Care is a self-directed training course designed for physicians, physician assistants and nurse practitioners. With growing awareness of racial and ethnic disparities in health and about the need for health care systems to accommodate increasingly diverse patient populations, cultural competence has become a matter of national concern. This e-learning program will equip health care providers with competencies for treating an increasingly diverse U.S. population. It requires registration, but is free of charge. <p>Think Cultural Health, DHHS (n.d.)—Advance Health Equity at Every Point of Contact</p> <p>User: Leader, Provider, Staff Setting: Hospital, Health care organization, Community organization</p> <ul style="list-style-type: none"> • The Advance Health Equity at Every Point of Contact includes multiple continuing education programs for culturally and linguistically appropriate services. Programs are designed to help individuals at all levels and in all disciplines promote health and health equity.
	<p>People with disabilities</p> <p>Fully Integrated Duals Advantage (2016)—Fully Integrated Duals Advantage Provider Training</p> <p>User: Leader, Provider, Staff Setting: Health care organization, Community organization</p> <ul style="list-style-type: none"> • Training modules, available on line and for download, include: <ul style="list-style-type: none"> – FIDA Provider Overview – Cultural Competency – Behavioral Health – Disability Awareness – Recovery and Wellness • Materials are available from 2015 and 2016 provider training. <p>Resources for Integrated Care (2016)—Leading Healthcare Practices And Training: Defining And Delivering Disability-Competent Care (Webinar)</p> <p>User: Leader, Provider, Staff Setting: Health care organization, Community organization</p> <ul style="list-style-type: none"> • Leading Healthcare Practices And Training is a Webinar series for providers and health care professionals, front-line staff with health plans and practices and stakeholders to introduce and explore the Disability-Competent Care (DCC) Model. Developed by providers serving adults with disabilities, the model is a resource for providers, health plans and health care organizations to improve capacity to integrate care for adults with disabilities. Webinars are tailored by audience and topic in this subject area, are free of charge on the Web site and do not require registration.

TRAINING AND EDUCATION FOR CULTURALLY AND LINGUISTICALLY COMPETENT GOVERNANCE, LEADERSHIP AND WORKFORCE

Training Material	Limited English proficiency
	<p>Agency for Healthcare Research and Quality (2015)—TeamSTEPPS Limited English Proficiency module</p> <p>User: Leader, Provider, Staff Setting: Hospital, Health care organization, Community organization</p> <ul style="list-style-type: none"> The TeamSTEPPS Limited English Proficiency module is designed to help develop and deploy a customized plan for training staff in teamwork skills and leading a medical teamwork improvement initiative in an organization, from initial concept development through sustaining positive changes. This evidence-based module will provide insight into the core concepts of teamwork as they apply to work with patients who have difficulty communicating in English. <p>Department of Health and Human Services (2011)—Breaking Down the Language Barrier: Translating Limited English Proficiency into practice video</p> <p>User: Leader Setting: Hospital, Health care organization, Community organization</p> <ul style="list-style-type: none"> This video focuses on federal requirements for language services under Title VI of the Civil Rights Act. It contains several scenes where language barriers result in poor care. <p>Think Cultural Health, DHHS (2011)—E-learning Program for Promotores de Salud</p> <p>User: Staff Setting: Health care organization, Community organization</p> <ul style="list-style-type: none"> This training targets “promotores de salud” (health promoters). The program teaches health promoters how to help others make changes in their lives and in their communities to enjoy better health. It can be viewed in Spanish or English. Topics include understanding healthy choices; helping people make healthy choices; understanding community changes and helping people make community changes. Training is free; requires registration to view. <p>California Academy of Family Physicians (2010)—Medical Assistants: Addressing Language and Culture in Health Care Practices</p> <p>User: Provider Setting: Hospital, Health care organization</p> <ul style="list-style-type: none"> This 37-minute video portrays the medical assistant’s role in addressing language and culture in health care practices. <p>Memorial Sloan Kettering Cancer Center: Immigrant Health and Cancer Disparities Services (n.d.)—Eliminating Language & Cultural Barriers to Care</p> <p>User: Leader, Provider, Staff Setting: Hospital, Health care organization, Community organization</p> <ul style="list-style-type: none"> For the nearly 10% of Americans and 25% of New Yorkers with LEP, accessing quality health care can be difficult. Memorial Sloan Kettering’s Immigrant Health and Cancer Disparities Service is working to eliminate language and cultural barriers to health care by increasing the supply of professionally trained medical interpreters and offering courses for medical professionals in cultural responsiveness. Training covers medical interpreting and cultural responsiveness for interpreters. Other services include interpreter screening and evaluation services and consulting. All trainings and services are fee based.

TRAINING AND EDUCATION FOR CULTURALLY AND LINGUISTICALLY COMPETENT GOVERNANCE, LEADERSHIP AND WORKFORCE

Training Material	Low health literacy
	<p>University of Minnesota School of Public Health (2015)—Culture and Health Literacy: Beyond Access</p> <p>User: Provider, Staff Setting: Hospital, Health care organization, Community organization</p> <ul style="list-style-type: none"> • This online course discusses how inequalities in communication contribute to health disparities. The objectives of the module are as follows: <ul style="list-style-type: none"> – Define health literacy. – Discuss the importance of improving health literacy. – Identify sources of health information used in multi-ethnic populations. – Describe health communication strategies that may be effective with multi-ethnic populations who rely on different sources of health information. – Identify appropriate web resources related to culture and health literacy. <p>Center for Disease Control and Prevention (n.d.)—Health Literacy for Public Health Individuals</p> <p>User: Provider, Staff Setting: Hospital, Health care organization, Community organization</p> <ul style="list-style-type: none"> • The purpose of this Web-based training program is to educate health professionals about public health literacy and their role in providing health information and services and promoting public health literacy. The course uses a 508-compliant template, knowledge checks, scenario-based interactions, video clips and a post-test to engage learners, and includes an evaluation, glossary and resource list. <p>Center for Disease Control and Prevention (n.d.)—Using numbers and explaining Risk</p> <p>User: Provider, Staff Setting: Hospital, Health care organization, Community organization</p> <ul style="list-style-type: none"> • This course explains health literacy and numeracy skills, comprehension of numerical and risk expressions, techniques to present numbers and state risk clearly and understandably and why clearly communicating health literacy, numeracy and risk is important. <p>Center for Disease Control and Prevention (n.d.)—Speaking with the Public</p> <p>User: Provider, Staff Setting: Hospital, Health care organization, Community organization</p> <ul style="list-style-type: none"> • This course explains health literacy and understanding of spoken communication, techniques to present spoken information clearly and understandably and the importance of health literacy and spoken communication.
	<p>Racial and ethnic minorities</p> <p>See Appendix 1 for additional resource(s) dated prior to 2005.</p>

TRAINING AND EDUCATION FOR CULTURALLY AND LINGUISTICALLY COMPETENT GOVERNANCE, LEADERSHIP AND WORKFORCE

Training Material	Sexual and gender minorities
	<p data-bbox="415 426 1360 453">Gay and Lesbian Medical Association (2014)—Cultural Competence Webinar Series (Webinar)</p> <p data-bbox="415 468 558 491">User: Provider</p> <p data-bbox="415 497 821 520">Setting: Hospital, Health care organization</p> <ul data-bbox="415 537 1466 680" style="list-style-type: none"> • The Cultural Competence Series is a three-part Webinar series that explores the health concerns and health care of LGBT people and is open to anyone. It reviews social determinants that influence how LGBT people seek and receive care and the impact they have on health. The series virtually follows the experience of LGBT people and those who care for them, and helps the viewer understand how to create welcoming health care environments that minimize disparities experienced by this population. <p data-bbox="415 707 1198 762">Substance Abuse and Mental Health Services Administration (n.d.)—LGBT Training Curricula for Behavioral Health and Primary Care Practitioners</p> <p data-bbox="415 779 558 802">User: Provider</p> <p data-bbox="415 808 821 831">Setting: Hospital, Health care organization</p> <ul data-bbox="415 848 1455 961" style="list-style-type: none"> • The LGBT Training Curricula for Behavioral Health and Primary Care Practitioners is a list of professional training curricula to improve the health and well-being of the LGBT population. Curricula provide guidance for behavioral healthcare and primary care practitioners, to help them assess, treat and refer LGBT clients in a culturally sensitive manner. <p data-bbox="415 989 1365 1073">National LGBT Health Education Center (A Program of The Fenway Institute) (n.d.)—Understanding Bisexuality: Challenging Stigma, Reducing Disparities, and Caring for Patients (Webinar)</p> <p data-bbox="415 1089 558 1113">User: Provider</p> <p data-bbox="415 1119 821 1142">Setting: Hospital, Health care organization</p> <ul data-bbox="415 1159 1450 1272" style="list-style-type: none"> • Understanding Bisexuality: Challenging Stigma, Reducing Disparities and Caring for Patients aims to help providers meet the needs of their bisexual patients. The Webinar focuses on disparities faced by bisexuals and challenges negative messages and stigma that surround the bisexual community. Access to the Webinar and presentation materials is free; requires registration. <p data-bbox="415 1299 1336 1354">National LGBT Health Education Center (A Program of The Fenway Institute) (n.d.)—Lesbian and Bisexual Women’s Health: Prevention, Wellness, and Empowerment (Webinar)</p> <p data-bbox="415 1371 612 1394">User: Provider, Staff</p> <p data-bbox="415 1400 1062 1423">Setting: Hospital, Health care organization, Community organization</p> <ul data-bbox="415 1440 1450 1583" style="list-style-type: none"> • Lesbian and Bisexual Women’s Health: Prevention, Wellness, and Empowerment provides information on the known health disparities and risk factors among lesbian and bisexual women. Women’s health specialist Jennifer Potter, MD, of Fenway Health and Beth Israel Deaconess Medical Center, Boston, provides viewers with effective communication strategies in the clinical setting and strategies to promote positive behavioral change in this population. Access to the Webinar and presentation materials is free; requires registration.

TRAINING AND EDUCATION FOR CULTURALLY AND LINGUISTICALLY COMPETENT GOVERNANCE, LEADERSHIP AND WORKFORCE

Training Material	Sexual and gender minorities
 <p>Training material</p>	<p>National LGBT Health Education Center (A Program of The Fenway Institute) (n.d.)—Meeting the Health Care Needs of Transgender People (Webinar)</p> <p>User: Leader, Provider Setting: Staff, Hospital, Health care organization</p> <ul style="list-style-type: none"> • Meeting the Health Care Needs of Transgender People discusses clinical issues and health disparities facing the transgender community and provides recommendations for improving care through education and organizational change. The Webinar covers developing a better understanding of transgender identities and lives, creating a welcoming and gender-affirming environment for transgender patients and staff and learning ways to use and document patient names and pronouns in clinical records. Access to the Webinar and presentation materials is free; requires registration. <p>National LGBT Health Education Center (A Program of The Fenway Institute) (n.d.)—Learning Modules</p> <p>User: Leader, Provider, Staff Setting: Hospital, Health care organization</p> <ul style="list-style-type: none"> • Learning modules include Achieving Health Equity for LGBT People; Improving Health Care for Transgender People; Caring for LGBTQ Youth in Clinical Settings; and Getting to Zero: Reducing HIV Incidence through Screening, Treatment, and Prevention. <p>National LGBT Health Education Center (A Program of The Fenway Institute) (n.d.)—Webinars and Video Trainings (Webinars)</p> <p>User: Leader, Provider, Staff Setting: Hospital, Health care organization</p> <ul style="list-style-type: none"> • Webinars and video trainings on numerous LGBT health topic areas. The center was designed in consultation with women with disabilities to meet their needs for accessible, regular exams and screenings. It offers a comprehensive, patient-centered model of care that encourages and facilitates equal access and accommodation of physical differences. 	

3.

Communication and Language Assistance

- Offer language assistance to individuals who have limited English proficiency and/or other communication needs, at no cost to them, to facilitate timely access to all health care and services.
- Inform all individuals of the availability of language assistance services clearly and in their preferred language, verbally and in writing.
- Ensure the competence of individuals providing language assistance, recognizing that the use of untrained individuals and/or minors as interpreters should be avoided.
- Provide easy-to-understand print and multimedia materials and signage in the languages commonly used by the populations in the service area.

Chapter Sections:

- Language assistance accessibility
- Guidance for providing language assistance
- Assessment of individuals providing language assistance
- Provision of materials (print, multimedia, etc.)
- Health literacy

LANGUAGE ASSISTANCE ACCESSIBILITY

Background Information	Limited English proficiency
	<p>The National Health Law Program (2010)—Language Access in Healthcare Statement of Principles: Explanatory Guide</p> <p>User: Leader, Provider Setting: Hospital, Health care organization, Community organization</p> <ul style="list-style-type: none"> The Statement of Principles in the Explanatory Guide addresses language access in health care at the national, state and local levels. Principles represent a consensus for a framework to ensure that language barriers do not affect health outcomes <p>National Council on Interpreting in Health Care (2009)—Sight Translation and Written Translation: Guidelines for Healthcare Interpreters</p> <p>User: Provider, Staff Setting: Hospital, Health care organization, Community organization</p> <ul style="list-style-type: none"> This position paper focuses on the special demands of sight translation and written translation in the context of the work of spoken language interpreting. It offers general guidance on the appropriate provision of sight translation and written translation services by a spoken language interpreter. It highlights the imperative that both consumers and providers of interpreter services understand the issues around on-the-spot translation by interpreters in order to ensure the highest quality of service. <p>National Association of the Deaf (n.d.)—Position Statement On Health Care Access for Deaf Patients</p> <p>User: Leader Setting: Hospital, Health care organization</p> <ul style="list-style-type: none"> The Position Statement On Health Care Access for Deaf Patients offers an overview of guidelines for providing deaf patients with access to health care. Web site includes the following guidelines: 1) clearly identify at-risk individuals for poor communication; 2) visual medical aids; 3) providers who know basic sign language; 4) establish an effective communication office policy; 5) provide qualified sign language interpreters; 6) ineffective methods of communication; 7) effective communication approaches: resources; and 8) relevant laws.

Lisa C. Diamond et al. (2012)—

[Does This Doctor Speak My Language? Improving the Characterization of Physician Non-English Language Skills](#)

User: Leader, Provider

Setting: Hospital, Health care organization

- In response to preliminary findings suggesting that multispecialty health care organization's nonvalidated and undefined three-category tool for physician self-report of non-English language proficiency levels was likely inadequate, the organization asked physicians to rate their proficiency using an adapted Interagency Language Roundtable (ILR) scale, a validated measure with five rating levels and descriptors. Six months after the ILR scale was implemented throughout the organization, 75 percent (258/342) of physicians had updated their proficiency ratings. The organization was willing to adopt a relatively straightforward change in how data were collected and presented to patients based on the face validity of initial findings

Tang et al. (2011)—[The Kaiser Permanente Clinician Cultural and Linguistic Assessment Initiative: Research and Development in Patient-Provider Language Concordance](#)

User: Leader, Provider

Setting: Hospital, Health care organization

- This article describes the Clinician Cultural and Linguistic Assessment Initiative to access and safeguard verifiable linguistic proficiency in clinical encounters. It describes Kaiser's development and implementation of the initiative, in which clinician language skills must achieve a specified level of proficiency to communicate directly with patients, without an interpreter. This article discusses accomplishments, lessons learned and promising practices to inform future efforts in language concordance.

PROVISION OF MATERIALS (PRINT, MULTIMEDIA, ETC.)

Background Information	Low health literacy
	<p>Centers for Medicare & Medicaid Services (2012)—Toolkit of Making Written Material Clear and Effective</p> <p>User: Leader, Staff Setting: Hospital, Health care organization, Community organization</p> <ul style="list-style-type: none"> • CMS created a toolkit to help stakeholders make printed material easier for people to read, understand, and use. <p>Best evidence statement (BEST) Guideline (2011)—Communication of health care information to patients and caregivers using multiple means</p> <p>User: Provider Setting: Hospital, Health care organization, Community organization</p> <ul style="list-style-type: none"> • This guideline recommends using multiple modes of communication to improve health literacy and understanding.

First impressions focus on the phone, the Web and the walk to the facility. The walking interview is a navigation exercise.

4.

Engagement, Continuous Improvement, and Accountability

- Establish culturally and linguistically appropriate goals, policies and management accountability, and infuse them throughout the organization's planning and operations.
- Conduct ongoing assessments of the organization's CLAS-related activities and integrate CLAS-related measures into measurement and continuous quality improvement activities.
- Collect and maintain accurate and reliable demographic data to monitor and evaluate the impact of CLAS on health equity and outcomes and to inform service delivery.
- Conduct regular assessments of community health assets and needs and use the results to plan and implement services that respond to the cultural and linguistic diversity of populations in the service area.
- Partner with the community to design, implement and evaluate policies, practices and services to ensure cultural and linguistic appropriateness.
- Create conflict and grievance resolution processes that are culturally and linguistically appropriate to identify, prevent and resolve conflicts or complaints.
- Communicate the organization's progress in implementing and sustaining CLAS to all stakeholders, constituents and the general public.

Chapter Sections:

- CLAS based organizational goals and policies
- Organizational assessment and measurement
- Data collection
- Community engagement (partnership and assessment)
- CLAS based conflict resolution
- Communication of progress in CLAS

RACIAL AND ETHNIC MINORITIES

L.A. Care Health Plan (2014)—[Quality Improvement Program Annual Report and Evaluation \(2014\)](#)

User: Leader

Setting: Health care organization

- The Annual Report and Evaluation describes the system L.A. Care uses to implement quality improvement activities and quantifiable goals. This 2014 report highlights and outlines key quality improvement accomplishments, and includes disparities analysis of HEDIS data to identify and address racial/ethnic disparities. The report contains a separate analysis for each HEDIS measure by seniors and people with disabilities (SPD) or non-SPD, race, ethnicity, gender and age, among other data points. Highlights from the analysis show that culture, ethnicity and geography can change perceptions and participation in seeking and attaining preventive health care.

DATA COLLECTION

Background Information	All populations
	<p>The Disparities Solution Center (2008)—Creating Equity Reports: A Guide for Hospitals</p> <p>User: Leader Setting: Hospital</p> <ul style="list-style-type: none"> • Creating Equity Reports is a guide to equity reporting and offers lessons learned and best practices for creating and using equity reports. The report includes an appendix of measures used in hospital-based research of inequalities. <p>Health Research and Educational Trust (2007)—HRET Disparities Toolkit</p> <p>User: Leader Setting: Hospital, Health care organization</p> <ul style="list-style-type: none"> • A Web-based tool that provides information and resources for hospitals, health systems, clinics and health plans for systematically collecting race, ethnicity and primary language data from patients. The toolkit is useful for educating and informing staff about the importance of data collection; how to implement a framework for collecting race, ethnicity and primary language data; and, ultimately, how to use these data to improve quality of care for all populations.

User: Leader

Setting: Hospital, Health care organization, Community organization

- The Center for Engagement and Inclusion was begun in 2008 to establish inclusion, respect, dignity and cultural awareness as core components of the employee, patient, health plan member and community experience. The Center aims to create an inclusive workplace, to ensure culturally appropriate care, to recruit and maintain a diverse workforce and to make a difference in the communities it serves. The links for "[Patient, Member and Customer Experience](#)" and "[Community Experience](#)" describe initiatives that UPMC conducted to engage patients, families and the community.

PEOPLE WITH DISABILITIES

Pro Infirmis (2013)—[Because Who is Perfect? \(public outreach video\)](#)

User: Leader, Provider, Staff

Setting: Hospital, Health care organization, Community organization

- This video depicts a campaign by Pro Infirmis, an organization for people with disabilities, for the International Day of Persons with Disabilities. In the video, "perfect" mannequins in store fronts are replaced with mannequins with scoliosis, brittle bone disease and other conditions.

RACIAL AND ETHNIC MINORITIES

L.A. Care Health Plan (2014)—[Quality Improvement Program Annual Report and Evaluation](#)

User: Leader, Provider, Staff

Setting: Hospital, Health care organization, Community organization

- The Annual Report and Evaluation describes the system L.A. Care uses to implement quality improvement activities and quantifiable goals. This 2014 report highlights and outlines key quality improvement accomplishments, and includes analysis of HEDIS data to identify and address racial/ethnic disparities. The report contains a separate analysis for each HEDIS measure by seniors and people with disabilities (SPD) or non-SPD, race, ethnicity, gender, age and other data points. Highlights from the analysis show that culture, ethnicity, and geography can change perceptions and participation in seeking and attaining preventive health care.

CLAS BASED CONFLICT RESOLUTION

Background Information	All populations
	<p>See Appendix 1 for additional resource(s) dated prior to 2005.</p>
Practical Tool	All populations
	<p>Mind Tools (n.d.)—Conflict Resolution: Using the “Interest-Based Relational” Approach User: Leader, Provider, Staff Setting: Hospital, Health care organization, Community organization</p> <ul style="list-style-type: none"> This resource includes a short, 3-minute video that summarizes the approach, and describes the approach in six steps for users to follow. The article also includes how to put each step into practice in order to resolve conflict. <p>See Appendix 1 for additional resource(s) dated prior to 2005.</p> <hr/> <p>People with disabilities</p> <p>U.S. Department of Health & Human Services (n.d.)—Example of a Section 504 Grievance Procedure that Incorporates Due Process Standards User: Leader Setting: Hospital, Health care organization, Community organization</p> <ul style="list-style-type: none"> HHS created an example of an organizational policy that outlines an internal grievance procedure for prompt and equitable resolution of complaints. The example allows organizations to update the policy with the name of their group and sections that are relevant to their organization.

COMMUNICATION OF PROGRESS IN CLAS

Practical Tool	All populations
	<p>Clinical and Translational Science Awards Consortium, Community Engagement Key Function Committee Task Force on the Principles of Community Engagement (2011)—Principles of Community Engagement User: Leader, Staff Setting: Hospital, Health care organization, Community organization</p> <ul style="list-style-type: none"> Principles of Community Engagement (Second Edition) provides public health professionals, health care providers, researchers, and community-based leaders and organizations with both a science base and practical guidance for engaging partners in projects that may affect them. The principles of engagement can be used by people in a range of roles, from the program funder who needs to know how to support community engagement to the researcher or community leader who needs hands-on, practical information on how to mobilize the members of a community to partner in research initiatives. In addition, this primer provides tools for those who are leading efforts to improve population health through community engagement. <p>See Appendix 1 for additional resource(s) dated prior to 2005.</p>

APPENDIX 1: ADDITIONAL RESOURCES

Governance, Leadership, and Workforce

Organizational governance and leadership to promote CLAS and health equity

Assessment or Measurement Tool	Racial and ethnic minorities
	<p>American College of Healthcare Executives, National Center for Healthcare Leadership, The Institute for Diversity, and American Hospital Association (2004)—Strategies for Leadership: Does your Hospital Reflect the Community it Serves? A Diversity and Cultural Proficiency Assessment Tool for Leaders</p> <p>User: Leader, Provider Setting: Hospital, Health care organization, Community organization</p> <ul style="list-style-type: none"> This Cultural Proficiency Assessment Tool includes an assessment checklist for hospital and health care leaders to evaluate the diversity and cultural proficiency of their organization and identify what activities and practices are in place or need to be implemented. The tool also includes action steps that organization leaders can take to facilitate discussion on diversity and cultural proficiency.

Training and education for culturally and linguistically competent governance, leadership and workforce

Training Material	Racial and ethnic minorities
	<p>The Commonwealth Fund (2004)—Worlds Apart: A Four-Part Series on Cross-Cultural Health Care (Video) and Facilitator Guide</p> <p>User: Provider Setting: Health care organization</p> <ul style="list-style-type: none"> This video series documents the experiences in the U.S. health care system of minority Americans and patients from other countries. Made with partial support from The Commonwealth Fund, this project dramatizes communication between patients and their doctors, tensions between modern medicine and cultural beliefs and the ongoing burdens of racial and ethnic discrimination. Videos are accompanied by a facilitator guide.

Engagement, Continuous Improvement, and Accountability

CLAS Based Organizational Goals and Policies

Practical Tool	All Populations
	<p>Agency for Healthcare Quality and Research (2003) - Planning Culturally and Linguistically Appropriate Services</p> <p>User: Leader Setting: Health care organization</p> <ul style="list-style-type: none"> To address shifting demographic trends in health care, this guide offers health plans an approach to defining the needs of multi-ethnic members and developing culturally and linguistically appropriate services for them. Printed copies of the guide and appendices (AHRQ Publication No. 03-R201 and No. 04-RG002 respectively) can be ordered from the AHRQ Publications Clearinghouse.

APPENDIX 1: ADDITIONAL RESOURCES

Engagement, Continuous Improvement, and Accountability

CLAS Based Organizational Goals and Policies

Practical Tool	Limited English proficiency
	<p>Agency for Healthcare Quality and Research (2003)—Providing Oral Linguistic Services</p> <p>User: Leader Setting: Health care organization</p> <ul style="list-style-type: none"> To address shifting demographic trends in health care, this guide offers an approach to defining the needs of members with LEP and developing strategies to meet communication needs. Printed copies of the guide and appendices (AHRQ Publication No. 03-R201 and No. 04-RG002, respectively) can be ordered from the AHRQ Publications Clearinghouse.

CLAS Based Conflict Resolution

Background Information	All populations
	<p>LeBaron, M. (1998)—Mediation and Multicultural Reality</p> <p>User: Leader, Provider, Staff Setting: Hospital, Health care organization, Community organization</p> <ul style="list-style-type: none"> <i>Mediation and Multicultural Reality</i> includes background information on the following topics: imperative of cultural sensitivity, conflict as a cultural event, cultural and individual identity in conflict, cultural patterns and conflict analysis, applying cultural frameworks to conflict processes and capacities for effective multicultural mediation.
Practical Tool	All populations
	<p>DuPraw, M., and Axner, M. (1997)—Working on Common Cross-Cultural Communication Challenges</p> <p>User: Leader, Provider, Staff Setting: Hospital, Health care organization, Community organization</p> <ul style="list-style-type: none"> <i>Working on Common Cross-Cultural Communication Challenges</i> describes six fundamental patterns of cultural difference and guidelines for multicultural collaboration. The six patterns include: 1) communications styles, 2) attitudes toward conflict, 3) approaches to completing tasks, 4) decision-making styles, 5) attitudes toward disclosure and 6) approaches to knowing. <p>Ford, J. (2001)—Cross Cultural Conflict Resolution in Teams</p> <p>User: Leader, Provider, Staff Setting: Hospital, Health care organization, Community organization</p> <ul style="list-style-type: none"> <i>Cross Cultural Conflict Resolution in Teams</i> focuses on the impact of culture on the prevention and resolution of conflict in teams. The article provides informative background information on topics such as, team dynamics and individualistic and collectivist dimensions of a culture. It also provides practical steps for the successful prevention and resolution of conflict.

Communication of Progress in CLAS

Practical Tool	All populations
	<p>The Medtronic Foundation (2000)—Getting the word out: Effective health outreach to cultural communities</p> <p>User: Leader Setting: Hospital, Health care organization, Community organization</p> <ul style="list-style-type: none"> <i>Getting the Word Out</i> is a guide to effective outreach for health organizations. In particular, this guide is intended for patient support organizations that would like to make their information, referral, support and advocacy services more accessible to people from a variety of cultural communities.

APPENDIX 2: ADDITIONAL ORGANIZATIONS OF INTEREST BY POPULATION

All Populations

[Association of Academic Health Centers](#)

The Association of Academic Health Centers (AAHC) is a non-profit organization that seeks to advance the nation's health and well-being through vigorous leadership of academic health centers. AAHC's mission is to improve the nation's health care system by mobilizing and enhancing the strengths and resources of the academic health care enterprise in health professions, education, patient care, and research. AAHC has an initiative around social determinant of health, and engages member institutions to develop approaches to individual and population health that include underlying social determinants. The Web site includes reports, stories from the field and additional comprehensive resources.

[The Commonwealth Fund](#)

The Commonwealth Fund is a private foundation that aims to promote a high-performing health care system that achieves better access, improved quality and greater efficiency, particularly for society's most vulnerable populations, including low-income people, the uninsured, minority Americans, young children and elderly adults. The Web site offers information on topics that include health care delivery, vulnerable populations and state health policy, and offers publications, surveys and data.

[CulturaLink](#)

CulturaLink helps health care systems develop a program for servicing multilingual and multicultural patients. Its focus is on understanding program status helping develop goals and objectives for improvement. Customized training programs teach diverse workforces how to properly manage cultural nuances of patients and deliver language services. CulturaLink resources are not free.

[The Disparities Solution Center](#)

The Disparities Solution Center was created to develop and implement policy-advancing practices to eliminate racial and ethnic disparities, improve quality and achieve health care equity. Its goal is to move beyond research to action—developing and disseminating models for improving quality and identifying and addressing racial and ethnic disparities in health care nationally, regionally and locally. The Web site includes programs and resources, Webinars and user guides.

[National Center for Cultural Competence](#)

The mission of the National Center for Cultural Competence is to increase the capacity of health care and mental health care programs to design, implement, and evaluate culturally and linguistically competent service delivery systems to address growing diversity, persistent disparities, and to promote health and mental health equity. Their Website provides distance learning modules, self-assessments, data vignettes and information for organizations, providers, faculty and families around culturally competent care.

[National Collaborative for Health Equity](#)

The mission of the National Collaborative for Health Equity is to promote health equity by harnessing evidence, developing leaders and catalyzing partnerships across the many different sectors that share responsibility for creating a more equitable and just society. The Web site offers informational Webinars, events, newsletters and fact sheets among other resources.

[Quality Interactions](#)

Quality Interactions partners with health care organizations to assess cultural competency needs and to determine customized learning pathways for professional staff. It provides resources for assessment, eLearning, quality improvement, and provides live trainings. This is not a free resource; organizations should contact Quality Interactions for more information.

Some state offices are addressing CLAS and health equity through public programs and initiatives. Below are a few examples.*

[Arizona's Health Disparities Center](#)

The Arizona Health Disparities Center is Arizona's central source of information and resources related to minority health and health disparities. It provides leadership by building networks and community capacity to reduce health disparities. The Web site includes links to related initiatives, programs and conferences.

[Maryland Office of Minority Health and Health Disparities](#)

Maryland's Office of Minority Health and Health Disparities works to promote health equity among African Americans, Asian Americans, Hispanic/Latino Americans and Native Americans, toward improving the health of all Marylanders. The Web site includes links to minority outreach and technical assistance, health equity data, cultural and linguistic competency and a health disparities collaborative.

APPENDIX 2: ADDITIONAL ORGANIZATIONS OF INTEREST BY POPULATION

All Populations

[Massachusetts Office of Health Equity](#)

The Massachusetts Office of Health Equity works to increase the Massachusetts Department of Public Health's capacity to respond effectively to the community's public health needs. Its goal is to promote the well-being and healing of linguistic, ethnic and racial minorities throughout the Commonwealth. The Web site includes links to a number of resources and services, such as health and disability programs, interpreter services and relevant data and statistics.

[Oregon Health Authority, Office of Equity and Inclusion](#)

The Office of Equity and Inclusion works with diverse communities to eliminate health gaps and promote optimal health in Oregon. By connecting people and programs, it can make substantial, measurable progress in improving the health of all Oregonians. The Web site includes training, resources and technical assistance for users, and information regarding its program Developing Equity Leadership through Training and Action.

*This list is not exhaustive of all states that have developed programs around CLAS and health equity.

[Published literature](#)

[L.M. Lines, M. Lepore, J.M. Wiener \(2015\)—Patient-centered, Person-centered, and Person-directed Care: They are Not the Same](#)

User: Leader, Provider

Setting: Hospital, Health care organization

- "Patient-centered, Person-centered, and Person-directed Care" is a two-page article that provides an overview of the similarities and differences in these three approaches to care. This article requires journal access and is not a free resource.

People with disabilities

[Administration for Community Living, U.S. Department of Health and Human Services](#)

The Administration for Community Living combines the efforts and achievements of the Administration on Aging, the Administration on Intellectual and Developmental Disabilities and the HHS Office on Disability to serve as the federal agency responsible for increasing access to community supports, while focusing attention and resources on the unique needs of older Americans and people with disabilities across their lives. The Web site includes background information, resources, programs in which they are involved and data and statistics on people with disabilities.

[Autistic Self Advocacy Network](#)

The Autistic Self Advocacy Network (ASAN) is a nonprofit organization run by and for Autistic people. ASAN was created to serve as a national grassroots disability rights organization for the Autistic community run by and for Autistic Americans, advocating for systems change and ensuring that the voices of Autistic people are heard in policy debates and the halls of power. The Web site provides background information regarding autism and resources, policies and projects.

[Health and Disability Advocates](#)

Health and Disability Advocates (HAD) is a social innovator that promotes health and economic security for vulnerable populations, so they can lead secure, dignified lives. HDA works with, but is not limited to, low-income families and individuals, children, youth, older adults, adults with disabilities and veterans and service members. Their Website includes resources and trainings for people with disabilities and accessing health care.

[National Association of the Deaf](#)

The National Association of the Deaf (NAD) is a civil rights organization of, by and for deaf and hard-of-hearing individuals in the US. The advocacy scope of the NAD covers areas of early intervention, education, employment, health care, technology, telecommunications, youth leadership and more. The NAD also carries out federal advocacy work through coalition efforts with specialized national deaf and hard-of-hearing organizations, as well as coalitions representing national cross-disability organizations.

[National Council on Disability](#)

The National Council on Disability is an independent federal agency that advises the president, congress and other federal agencies regarding policies, programs, practices and procedures that affect people with disabilities. The Web site includes publications, meetings and events and resources that cover a variety of topics, including health care, education and housing.

[Registry of Interpreters for the Deaf, Inc.](#)

The Registry of Interpreters for the Deaf advocates for best practices in interpreting, professional development for practitioners and the highest standards in the provision of interpreting services for diverse users of signed and spoken languages.

APPENDIX 2: ADDITIONAL ORGANIZATIONS OF INTEREST BY POPULATION

Limited English proficiency

[International Medical Interpreters Association](#)

The International Medical Interpreters Association is a US-based, international organization committed to the advancement of professional medical interpreters as the best practice to equitable language access to health care for linguistically diverse patients. The Web site provides educational resources, publications, events and standards, in addition to other information.

[Limited English Proficiency \(LEP\): A Federal Interagency Website](#)

LEP.gov promotes the importance of language access to federally conducted and assisted programs. The site provides and links users to information, tools and technical assistance regarding LEP and language services for federal agencies, recipients of federal funds, users of federal programs and federally assisted programs and other stakeholders.

[National Council on Interpreting in Health Care](#)

The National Council on Interpreting in Health Care is a multidisciplinary organization whose mission is to promote and enhance language access in health care in the United States. The Web site includes resources on ethics and standards on practice, Webinars and mentoring for health care interpreter trainers and standards for training.

[Think Cultural Health](#)

Think Cultural Health is the flagship initiative of the OMH Center for Linguistic and Cultural Competence in Health Care. The goal of Think Cultural Health is to advance health equity at every point of contact through development and promotion of CLAS. The Web site offers resources and tools to promote cultural and linguistic competency in health care, and continuing education programs and tools.

[Published literature](#)

[Tuot DS, Lopez M, Miller C, Karliner LS. \(2012\)—Impact of an easy-access telephonic interpreter program in the acute care setting: an evaluation of a quality improvement intervention.](#)

User: Leader, Provider

Setting: Hospital, Health care organization

- A study demonstrating that providing easy access to professional interpreters in the hospital via dual handset telephones increases physician and nurse use of professional interpreter services, without decreasing use of in-person interpreters for more complex conversations. This article requires journal access and is not a free resource.

[Flores et al. \(2012\)—Errors of medical interpreting and their potential clinical consequences. a comparison of professional versus ad hoc versus no interpreters.](#)

User: Leader, Staff

Setting: Hospital, Health care organization

- To compare interpreter errors and their potential consequences in encounters with professional versus ad hoc versus no interpreters. Professional interpreters result in a significantly lower likelihood of errors of potential consequence than ad hoc and no interpreters. Among professional interpreters, hours of previous training, but not years of experience, are associated with error numbers, types and consequences. These findings suggest that requiring at least 100 hours of training for interpreters might have a major impact on reducing errors and their consequences in health care, while improving quality and patient safety.

[Karliner LS, Mutha S. \(2010\)—Achieving quality in health care through language access services: lessons from a California public hospital.](#)

User: Leader, Provider

Setting: Hospital

- A case study demonstrating the importance of organizational commitment, early information technology involvement, attention to clinical needs, active engagement of stakeholders and coordinated project management to the provision of high-quality language services. This article requires journal access and is not a free resource.

APPENDIX 2: ADDITIONAL ORGANIZATIONS OF INTEREST BY POPULATION

Low health literacy

[Agency for Healthcare Research and Quality](#)

The Agency for Healthcare Research and Quality Web site covers the topic of health literacy and provides a list of links to resources that include measurement tools, pharmacy health literacy resources and patient information.

[Centers for Disease Control and Prevention](#)

The Centers for Disease Control and Prevention offers a Web site dedicated to health literacy. The site provides information and tools to improve health literacy and public health. Resources are for all organizations that interact and communicate with people about health.

[National Institutes of Health](#)

The National Institutes of Health offers a Web site called “Clear Communication” that focuses on health literacy issues. The Web site includes four sections of information and resources: (1) Health Literacy; (2) Plain Language; (3) Clear & Simple; and (4) Cultural Respect.

[Polyglot](#)

Polyglot offers an online tool called Meducation that generates personalized medication instructions. Patient-specific medication instructions—drug, dose, time of day—are simplified to a 5th-8th grade reading level and presented in intuitive formats. Pictograms of time of day and medication techniques convey information unambiguously. All content is available in more than 20 languages and can be delivered to patients electronically or in printed information. All content is accessible by patients from home via the patient portal. This is not a free resource.

[U.S. Department of Health and Human Services, Office of Disease Prevention and Health Promotion](#)

The Office of Disease Prevention and Health Promotion Web site is focused on health literacy and includes links to resources in three categories: 1) tools for improving health literacy; 2) government resources; and 3) reports and research.

Racial and ethnic minorities

[Civil Rights Mediation](#)

The Civil Rights Mediation website includes a checklist of things to think about and materials for intermediaries and disputants, and offers links to many sources of further information on each of the question topics.

[DiversityRX](#)

DiversityRx’s goal is to improve the accessibility and quality of health care for minority, immigrant, and indigenous communities. They support those who develop and provide health services that are responsive to the cultural and linguistic differences presented by diverse populations. Their Website provides information on various cross cultural health care topics, activities to encourage participation in the CLAS community, resources including cross cultural organizations, blogs and events.

[Finding Answers: Disparities Research for Change](#)

Finding Answers’ core goals are: 1) find promising solutions to reduce disparities; 2) encourage the spread of best practices; and 3) create an evidence-based, practical framework to help health care providers design their own interventions to reduce disparities. The Web site disseminates information, best practices and tools to health care systems, to help them recognize and act on equity. Site tools capture the main lessons so that other health care organizations can successfully reduce disparities via quality improvement efforts.

[Institute for Diversity \(an affiliate of the American Hospital Association\)](#)

The Institute for Diversity in Health Management is committed to expanding health care leadership opportunities for ethnically, culturally and racially diverse individuals, and increasing the number of these individuals entering and advancing in the field. The Web site includes information about becoming a member of the institute, conferences, symposiums and published resources on a variety of health topics.

[National REACH Coalition](#)

The National REACH Coalition supports organizations in developing community-centered, racially and ethnically appropriate interventions that are practice/evidence-based to advance a social model of environmental, programmatic and infrastructural change at the local, state and national levels. The Web site includes information about its programs and resources, including information about access to health care, publications and newsletters.

APPENDIX 2: ADDITIONAL ORGANIZATIONS OF INTEREST BY POPULATION

Sexual and gender minorities

[Center of Excellence of Transgender Health](#)

The Center of Excellence for Transgender Health's mission is to increase access to comprehensive, effective and affirming health care services for transgender communities. The Web site includes a list of primary care protocols for transgender patient care, including topics such as fertility issues, insurance issues, harm reduction, vaccinations, follow-up care and mental health. It also includes information around routine care, HIV prevention and cultural competence.

[Family Acceptance Project](#)

The Family Acceptance Project is funded by individual donors, agencies and visionary foundations including The California Endowment, the Annie E. Casey Foundation and by a matching grant by the Robert Wood Johnson Foundation. The goals of the project are to: 1) study families' and caregivers' adjustment to an adolescent's coming out and LGBT identity, 2) develop training and assessment materials, 3) develop resources to strengthen families to support LGBT children and adolescents and 4) develop a new model of family-related care to prevent health and mental health risks, keep families together and promote well-being for LGBT children and adolescents. Their Web site includes assessments, training materials and other resource links.

[Fenway Health](#)

The mission of Fenway Health is to enhance the wellbeing of the lesbian, gay, bisexual and transgender community and all people in our neighborhoods and beyond through access to the highest quality health care, education, research and advocacy. The Web site offers information about research, health policy, publications and education and training for health care staff.

[Human Rights Campaign](#)

The Human Right Campaign is a national LGBT civil rights organization, and envisions an America where LGBT people are ensured of their basic equal rights and can be open, honest and safe at home, at work and in the community. The Web site includes a variety of resources and programs on many topics, including children and youth, state and local advocacy, adoption and HIV and AIDS.

[LGBT HealthLink](#)

LGBT HealthLink, formerly The Network for LGBT Health Equity, is a community-driven network of advocates and professionals looking to enhance LGBT health by reducing disparities regarding tobacco use, cancer and other health issues in the community. It is 1 of 8 CDC-funded tobacco and cancer disparity networks, and advances these issues primarily by linking people and information to advocate for policy change.

[National LGBT Health Education Center](#)

The National LGBT Health Education Center provides educational programs, including Webinars and training tools, resources and consultation to health care organizations, with the goal of optimizing quality, cost-effective health care for LGBT people.

[Parents and Friends of Lesbians and Gays](#)

Parents and Friends of Lesbians and Gays (PFLAG) is committed to advancing equality and full societal affirmation of LGBTQ people through its threefold mission of support, education and advocacy. The Web site provides education and programs, and information about advocacy and important issues affecting the LGBTQ community and resources.

[Services and Advocacy for Gay, Lesbian, Bisexual & Transgender Elders](#)

Services and Advocacy for Gay, Lesbian, Bisexual & Transgender Elders (SAGE) is dedicated to improving the lives of LGBT older adults, and has a mission to be the lead in addressing issues related to LGBT aging. Their Web site offers information on their national programs, advocacy initiatives and resources including publications and videos.

[World Professional Association for Transgender Health](#)

The World Professional Association for Transgender Health, formerly known as the Harry Benjamin International Gender Dysphoria Association, is a non-profit, interdisciplinary professional and educational organization devoted to transgender health. The Web site includes training, publications, resources and standards of care for areas of health, including primary care, gynecology and mental health.
